

## **Geography CAGs**

The Geography CAGs were calculated by using the coursework marks (20%) and the January mock exams for both paper 1 (30%) and paper 2 (30%). Where retakes were taken and improvements were made, these were used instead of the original January mock result. The final grades were calculated using weighted percentages, with Paper 3 (20%) to consider when deciding which grade. Grade boundaries from the previous year were used as guidance for these grades.
