

CAGs In Accounting

The CAG was created by looking at all the work the student submitted on Markbook over the whole period up to 20th March when the college closed. As per Ofqual instructions I did not consider any work submitted after this date. The weighting In Accounting Markbook is 0 for homework, 0.25 for stage/end of topic tests and 1 for mock exams ie all test based. I also gave consideration to the amount of effort and commitment that students demonstrated following the January mocks. I also considered previous years' results, specifically that interim tests tend to be easier to score highly in than 3 hours linear exams
